

ViewEditQuiz

```
graph LR; ViewEditQuiz --> CtrlQuiz;
```

The diagram illustrates a dependency between two classes. On the left is a large rectangular box representing the **ViewEditQuiz** class, which is divided into three horizontal sections. On the right is a smaller rectangular box representing the **CtrlQuiz** class, also divided into three horizontal sections. A horizontal arrow points from the right side of the **ViewEditQuiz** box to the left side of the **CtrlQuiz** box, indicating that **ViewEditQuiz** depends on **CtrlQuiz**. Both boxes have a light gray drop shadow.
