

GenericQuiz

```
classDiagram
    class GenericQuiz
    class QuizStatistics {
        -general: Info
        -timesSolved: int
        -successRate: double
        -averageResult: double
    }
    GenericQuiz --> QuizStatistics
```

The diagram shows a class **GenericQuiz** on the left and a class **QuizStatistics** on the right. An arrow points from **GenericQuiz** to **QuizStatistics**. The **QuizStatistics** class has four attributes: **-general: Info**, **-timesSolved: int**, **-successRate: double**, and **-averageResult: double**.

QuizStatistics

-general: Info
-timesSolved: int
-successRate: double
-averageResult: double
