

**PasswordRecover**

```
classDiagram
    PasswordRecover --> SessionController
```

The diagram shows a class **PasswordRecover** on the left and a class **SessionController** on the right. A solid line with an open arrowhead points from **PasswordRecover** to **SessionController**, indicating a dependency. The **SessionController** class has a public method **+checkAuthorization(user: String): bool**.

**SessionController**

**+checkAuthorization(user: String): bool**
