

**ClassQuiz**

```
classDiagram
    ClassQuiz --> StudentStatistics
```

The diagram shows a class named **ClassQuiz** on the left and a class named **StudentStatistics** on the right. An arrow points from **ClassQuiz** to **StudentStatistics**, indicating an association. The **StudentStatistics** class has four attributes: `-general: Info`, `-firstName: String`, `-lastName: String`, and `-result: double`.

**StudentStatistics**

-general: Info  
-firstName: String  
-lastName: String  
-result: double
