

**QuestionRouter**

```
classDiagram
    class QuestionRouter
    class StatisticsQuestionUpdater {
        +updateStats(question: String, statistics: JSON): void
    }
    QuestionRouter --> StatisticsQuestionUpdater
```

The diagram shows a class **QuestionRouter** on the left and a class **StatisticsQuestionUpdater** on the right. An arrow points from **QuestionRouter** to **StatisticsQuestionUpdater**. The **StatisticsQuestionUpdater** class has a public method `+updateStats(question: String, statistics: JSON): void`.

**StatisticsQuestionUpdater**

+updateStats(question: String, statistics: JSON): void
