

HomepageDirector

```
classDiagram
    class HomepageDirector {
    }
    class HeaderLoggedDirector {
    }
    HomepageDirector --> HeaderLoggedDirector
```

The diagram illustrates a directed association between two classes. On the left is the **HomepageDirector** class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name, while the two lower compartments are empty. On the right is the **HeaderLoggedDirector** class, represented by a larger rectangle with three horizontal compartments. The top compartment contains the class name, the middle compartment is empty, and the bottom compartment is a large, empty rectangular area. A solid black arrow points from the right side of the **HomepageDirector** class to the left side of the **HeaderLoggedDirector** class, indicating a directed association.

HeaderLoggedDirector
