

QuizFetcher

```
classDiagram
    class QuizFetcher {
    }
    class QMLParser {
        +parse(question: String): JSON
    }
    QuizFetcher --> QMLParser
```

The diagram shows two class boxes. The left box is labeled 'QuizFetcher' and has two empty compartments below the name. The right box is labeled 'QMLParser' and has a compartment below the name containing the text '+parse(question: String): JSON'. A horizontal line with an open arrowhead points from the right side of the 'QuizFetcher' box to the left side of the 'QMLParser' box, indicating a dependency.

QMLParser

+parse(question: String): JSON
