

Quizzipedia::Server::ControllerServer::ClassManager

ClassDeleter

ClassAdder

ClassUpdater

FromClassRemover

InClassAdder

TeachersClassFetcher

StudentsClassFetcher

Organizations

```
classDiagram
    package Quizzipedia::Server::ControllerServer {
        ClassDeleter
        ClassAdder
        ClassUpdater
        FromClassRemover
        InClassAdder
        TeachersClassFetcher
        StudentsClassFetcher
    }
    Quizzipedia::Server::ControllerServer --> Organizations
```

The diagram illustrates a package structure for 'Quizzipedia::Server::ControllerServer' which contains seven classes: 'ClassDeleter', 'ClassAdder', 'ClassUpdater', 'FromClassRemover', 'InClassAdder', 'TeachersClassFetcher', and 'StudentsClassFetcher'. Each class is represented by a rectangle with a title bar and two empty slots for attributes and methods. A dashed arrow points from the package boundary to the 'Organizations' class, indicating a dependency or association.
