

QuizStatistics

- general: Info
- timesSolved: int
- successRate: double
- averageResult: double

QuizStatisticsFetcher

```
classDiagram
    class QuizStatistics {
        -general: Info
        -timesSolved: int
        -successRate: double
        -averageResult: double
    }
    class QuizStatisticsFetcher {
    }
    QuizStatisticsFetcher --|> QuizStatistics
```

The diagram illustrates a class hierarchy. At the top is the **QuizStatistics** class, which contains four attributes: `-general: Info`, `-timesSolved: int`, `-successRate: double`, and `-averageResult: double`. Below it is the **QuizStatisticsFetcher** class, which is an empty class box. A vertical line with an open arrowhead points from the **QuizStatisticsFetcher** class to the **QuizStatistics** class, indicating that **QuizStatisticsFetcher** inherits from **QuizStatistics**.
