

ShortAnswerQ

```
classDiagram
    class ShortAnswerQ
    class AnswerShortAnswer {
        -givenAnswer: String
        +check(): bool
        +getGivenAnswer(): String
        +setAnswer(answer: String): void
    }
    ShortAnswerQ ..> AnswerShortAnswer
```

The diagram shows a class **ShortAnswerQ** on the left and a class **AnswerShortAnswer** on the right. A dashed line with an open arrow points from **ShortAnswerQ** to **AnswerShortAnswer**, indicating a directed association.

AnswerShortAnswer

-givenAnswer: String

+check(): bool

+getGivenAnswer(): String

+setAnswer(answer: String): void
